## ABOUT ME

Agile Coach, Scrum Master, and e-Commerce Web Technology Consultant, I have led B2B e-Commerce redesign projects for various companies.

My involvement in associations with socially and ecologically committed projects, supported by my role as an elected official at the town hall of my city since 2020, puts agility at the heart of my actions.

My career has allowed me to combine my artistic skills, my technical expertise, and my passion for communication, project management, and web development, currently culminating in my role as Agile Coach at Clever Age.
